## Proximity Card Readers

Honeywell's OmniProx family is a complete line of 125 kHz HID compatible proximity readers that delivers outstanding and consistent performance in a small package with attractive styling and colors to fit any décor.

All OmniProx readers (except the OP90 & OP95) include three bezels: black, charcoal gray and ivory and are constructed with rugged polycarbonate materials potted for both indoor and outdoor applications.

The OmniProx family of readers combines unique functionality, high-quality engineering and design for a variety of applications in the electronic access control market.

OmniProx readers offer superb reliability and consistent read range. Installation is simple and fast with a mounting template included in all models. In addition the readers are compatible with the clock&data interface from the ACS-2 and ACS-8 controller.

Increased security functions like optical tamper and security screw prevent unauthorized users from removing the reader from the wall or attempting to compromise the system.

For locations that require a proximity reader to be able to withstand vandal-prone environments, the OP90 & OP95 vandal resistant readers are an ideal choice.
